Behavioral Differences in Seeking Help for Mental Health Among Generation Z from the Kodi People Group and the Madurese Ethnic Group

ARTICLE INFO	ABSTRACT
Article History: Submit: _____ Revised: _____ Accepted: _____ Available online: _____ Keywords: Mental Health, Help Seeking, Generation Z, Kodi, Madurese	Background: mental health problems in generation Z of the Kodi People Group and Madurese ethnic group in their behavior in seeking mental health assistance, it is influenced by the culture and the archipelago of the two islands. The purpose of this study is to analyze the differences in the behavior of mental help seeking from Generation Z in the Kodi people group and Madurese ethnic group. Methods: This research used quantitative research method, namely, the survey method. The subjects of this study were Generation Z from the Kodi people group and the Madurese who have experienced mental health problems such as stress, anxiety, depression, suicidal thought, drug use, and physical illness. The sampling technique used was purposive sampling with a total of 200 respondents from Generation Z. This study used the instrument of General Help-Seeking Questionnaire Vignette Version (GHSQ-V). The hypothesis test in this study was a paired t-test. This research was conducted from February to March 2022 by distributing Google Forms questionnaires to WhatsApp group chats, social media such as Facebook and Instagram, and email. Results: The Results of T-Test Analysis of Behavior in seeking mental health assistance among Generation Z from the Kodi people group and the Madurese ethnic group was 0.905 Conclusion: It can be said that there is no significant difference in the behavior of seeking mental health help between Generation Z of the Kodi people group and the Madurese ethnic group.
